**DETAILED ACTION*****Allowable Subject Matter******Claims 1-2, 5, 7-11, 13-15, 17-20, and 22-23.***

1. The following is an examiner statement of reasons for allowance: After reviewing the remarks made by applicant in response to the non-final office action and amending the claims to incorporate the subject matter allowable in the first office action, the examiner finds the remarks persuasive. Chandra et al (SVD based approach to transparent embedding data into digital images) teaches embedding a bit of data through slight modifications of SVs of a small block of the segmented covers. , the size of small Blocks is used as an attribute to achieve a tradeoff between the embedded data rate and robustness wherein the condition number of the operator increases by increasing the value of the largest singular value (see figure 1 and paragraph 2.1). Wong et al (A public key watermark for image verification and authentication) teaches embedding a digital signature extracted from the most significant bits of a block of the image into the least significant bit of the pixels in the same block. None teaches “generating at least a first ill-conditioned operator, said ill conditioned operator being related to values extracted from an image or portion thereof A; and replacing a non-zero singular value of a singular value matrix SA of an image or portion thereof A, with a solution to a linear equation comprising the ill-conditioned operator, wherein the non-zero singular value to be replaced is the smallest non-zero singular value  $S(A)$  in a singular value matrix SA. of rank  $r$ ”. The Examiner finds no reason or motivation to combine the above references in an obviousness rejection thus placing the application in condition for allowance.

2. Any comments considered necessary by applicant must be submitted on later than the payment of the issue fee and to avoid processing delays should preferably accompany the issue fee. Such submissions should be clearly labeled, comments on statement of reasons for allowance.
